

HORSE TRAINING FOR HORSE LOVERS

DEMO IN EQUINE LEARNING THEORY

10AM SATURDAY 7TH APRIL

BLUE CROSS REHOMING CENTER, BURFORD, OX18 4PF

10-12pm Horse Training Made Simple Seminar - How do horses learn, is your horse misbehaving or misunderstood, how you can be safe, effective and make your horse feel good.

1-4pm Practical Clinic - You can then observe practically what you have just learnt in Lisa's Equitation Science clinic.

What is EquiSci?

Equitation Science demystifies training so you can understand how your horse learns from simple explanations, demonstrations, constant feedback and practice of proven 'tools' to improve relaxation, lightness and responsiveness, whatever your discipline. We apply an academic horse training system, developed by the Australian Equine Behavior Centre (the only horse training system in the world to have embedded the ISES 8 training principles) within each lesson, facilitating effective, ethical & safe training.
